

BINDER-**t**ecsys Kontakte

COMPONENTS FOR THE AUTOMOTIVE

Components for the automotive industry:

- welded and assembled
- alumina and stainless steel drawn parts
- metal plastic parts
- metal parts with spezial surface effects
- powder coating metal plastic parts

INDUSTRY

Contact rivets

- solid rivets
- bimetal rivets

Modern automation technology is reliable and reduces the number of errors in your production.

- As a producer of stamping tools we are specialised in the production of customised part feed automation (stamping packages).
- We realise your requirements including the development, planning, design and building of your tools and production line.
- All the processes are fine tuned to work smoothly together.

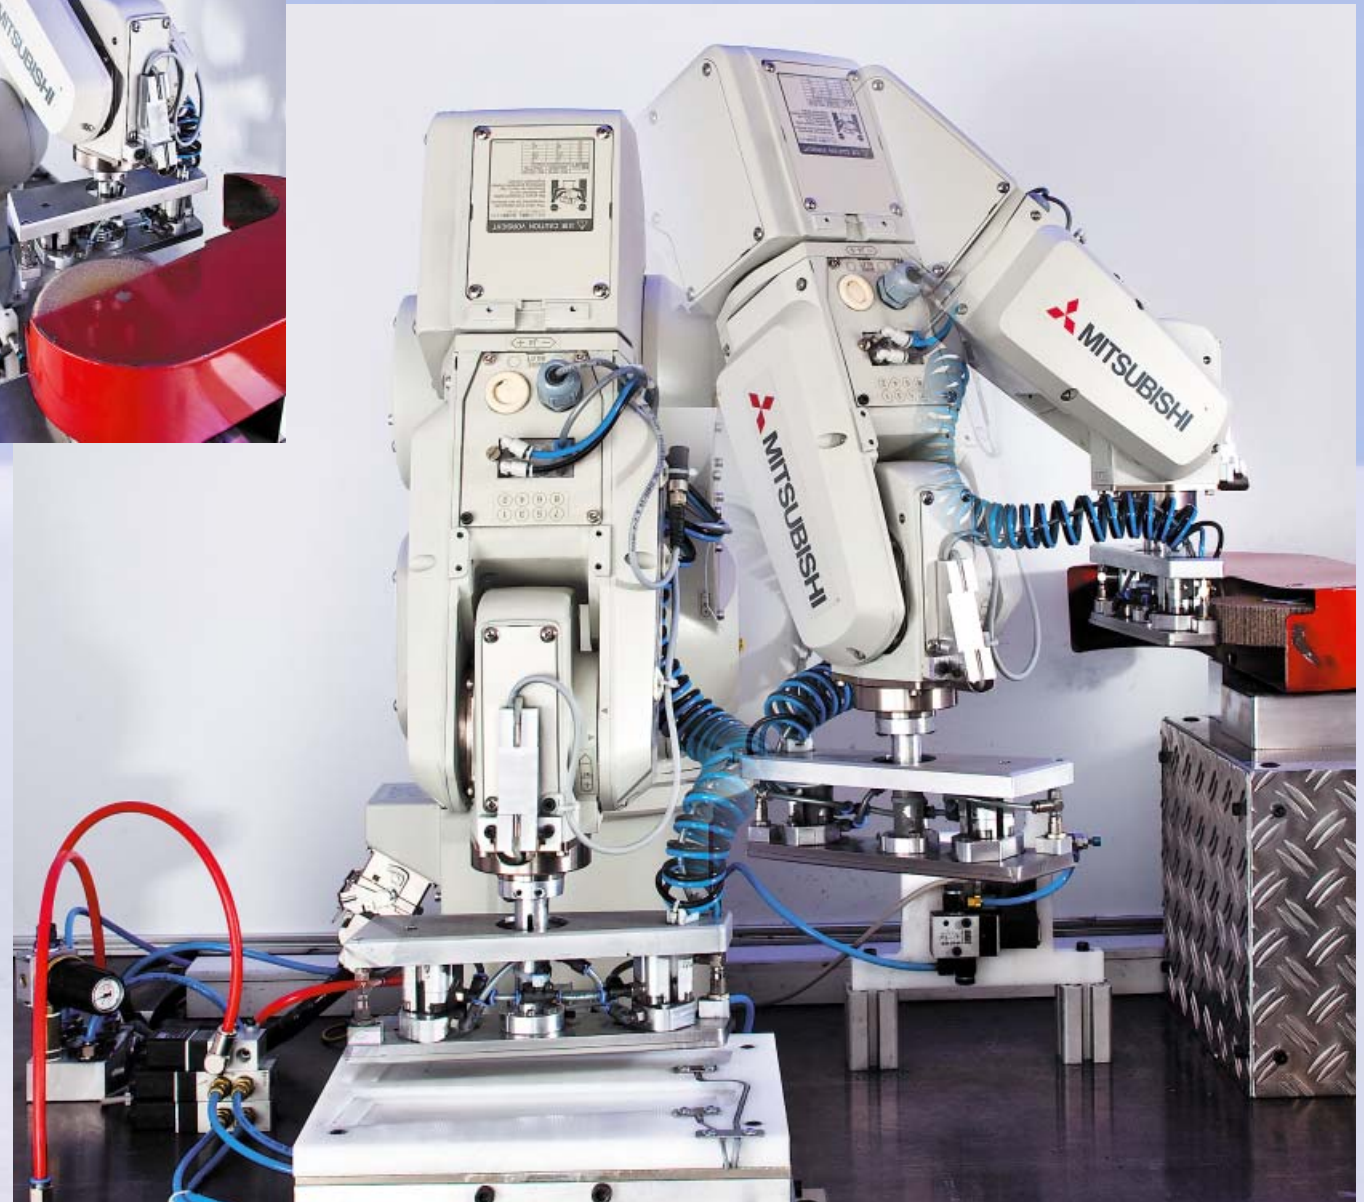

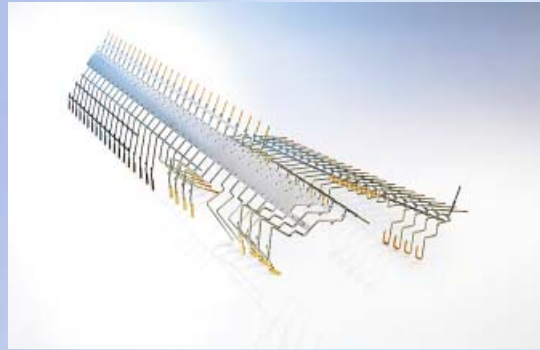

AUTOMATION

– A TEAM OF SPECIALISTS FOR ALL YOUR REQUIREMENTS

Our service for you:

- Fully automated or semi-automated systems
- Systems inspected and approved by DEKRA
- Systems with the CE mark of conformity
- Remote diagnostics for troubleshooting
- Telephone hotline and on-site technical support
- Excellent flexibility and integration of customer requirements
- All purchased parts exclusively from well-known companies

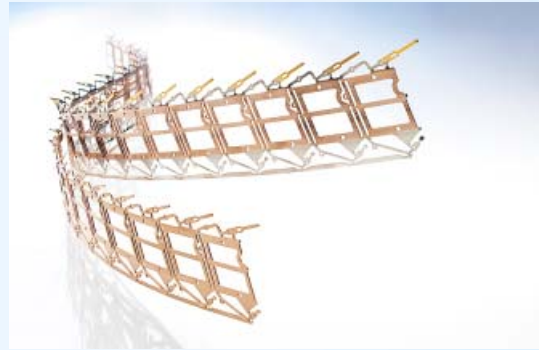

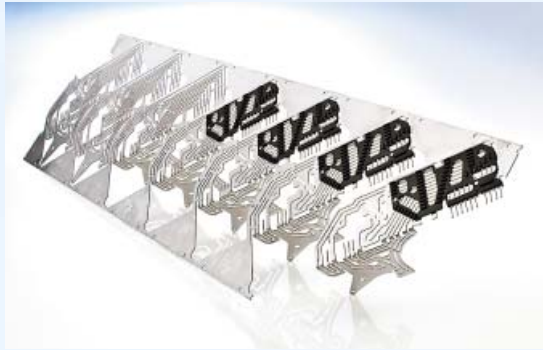

Stampings

- special for assembling
- pre molded parts
- assembled components
- riveted pre mold parts

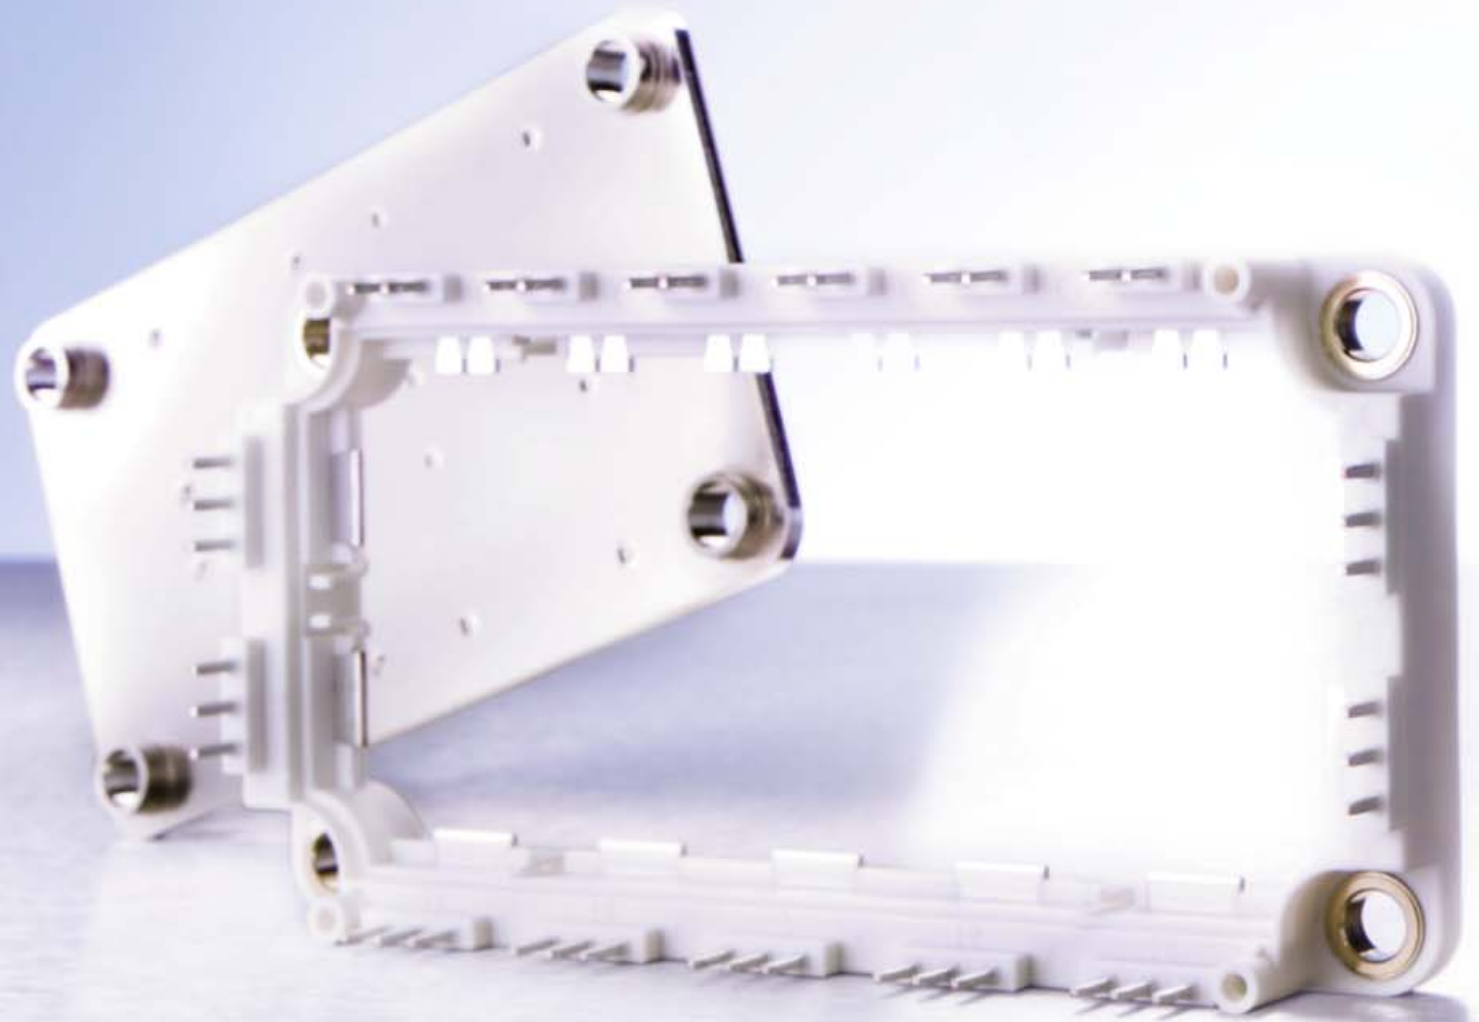

STAMPINGS

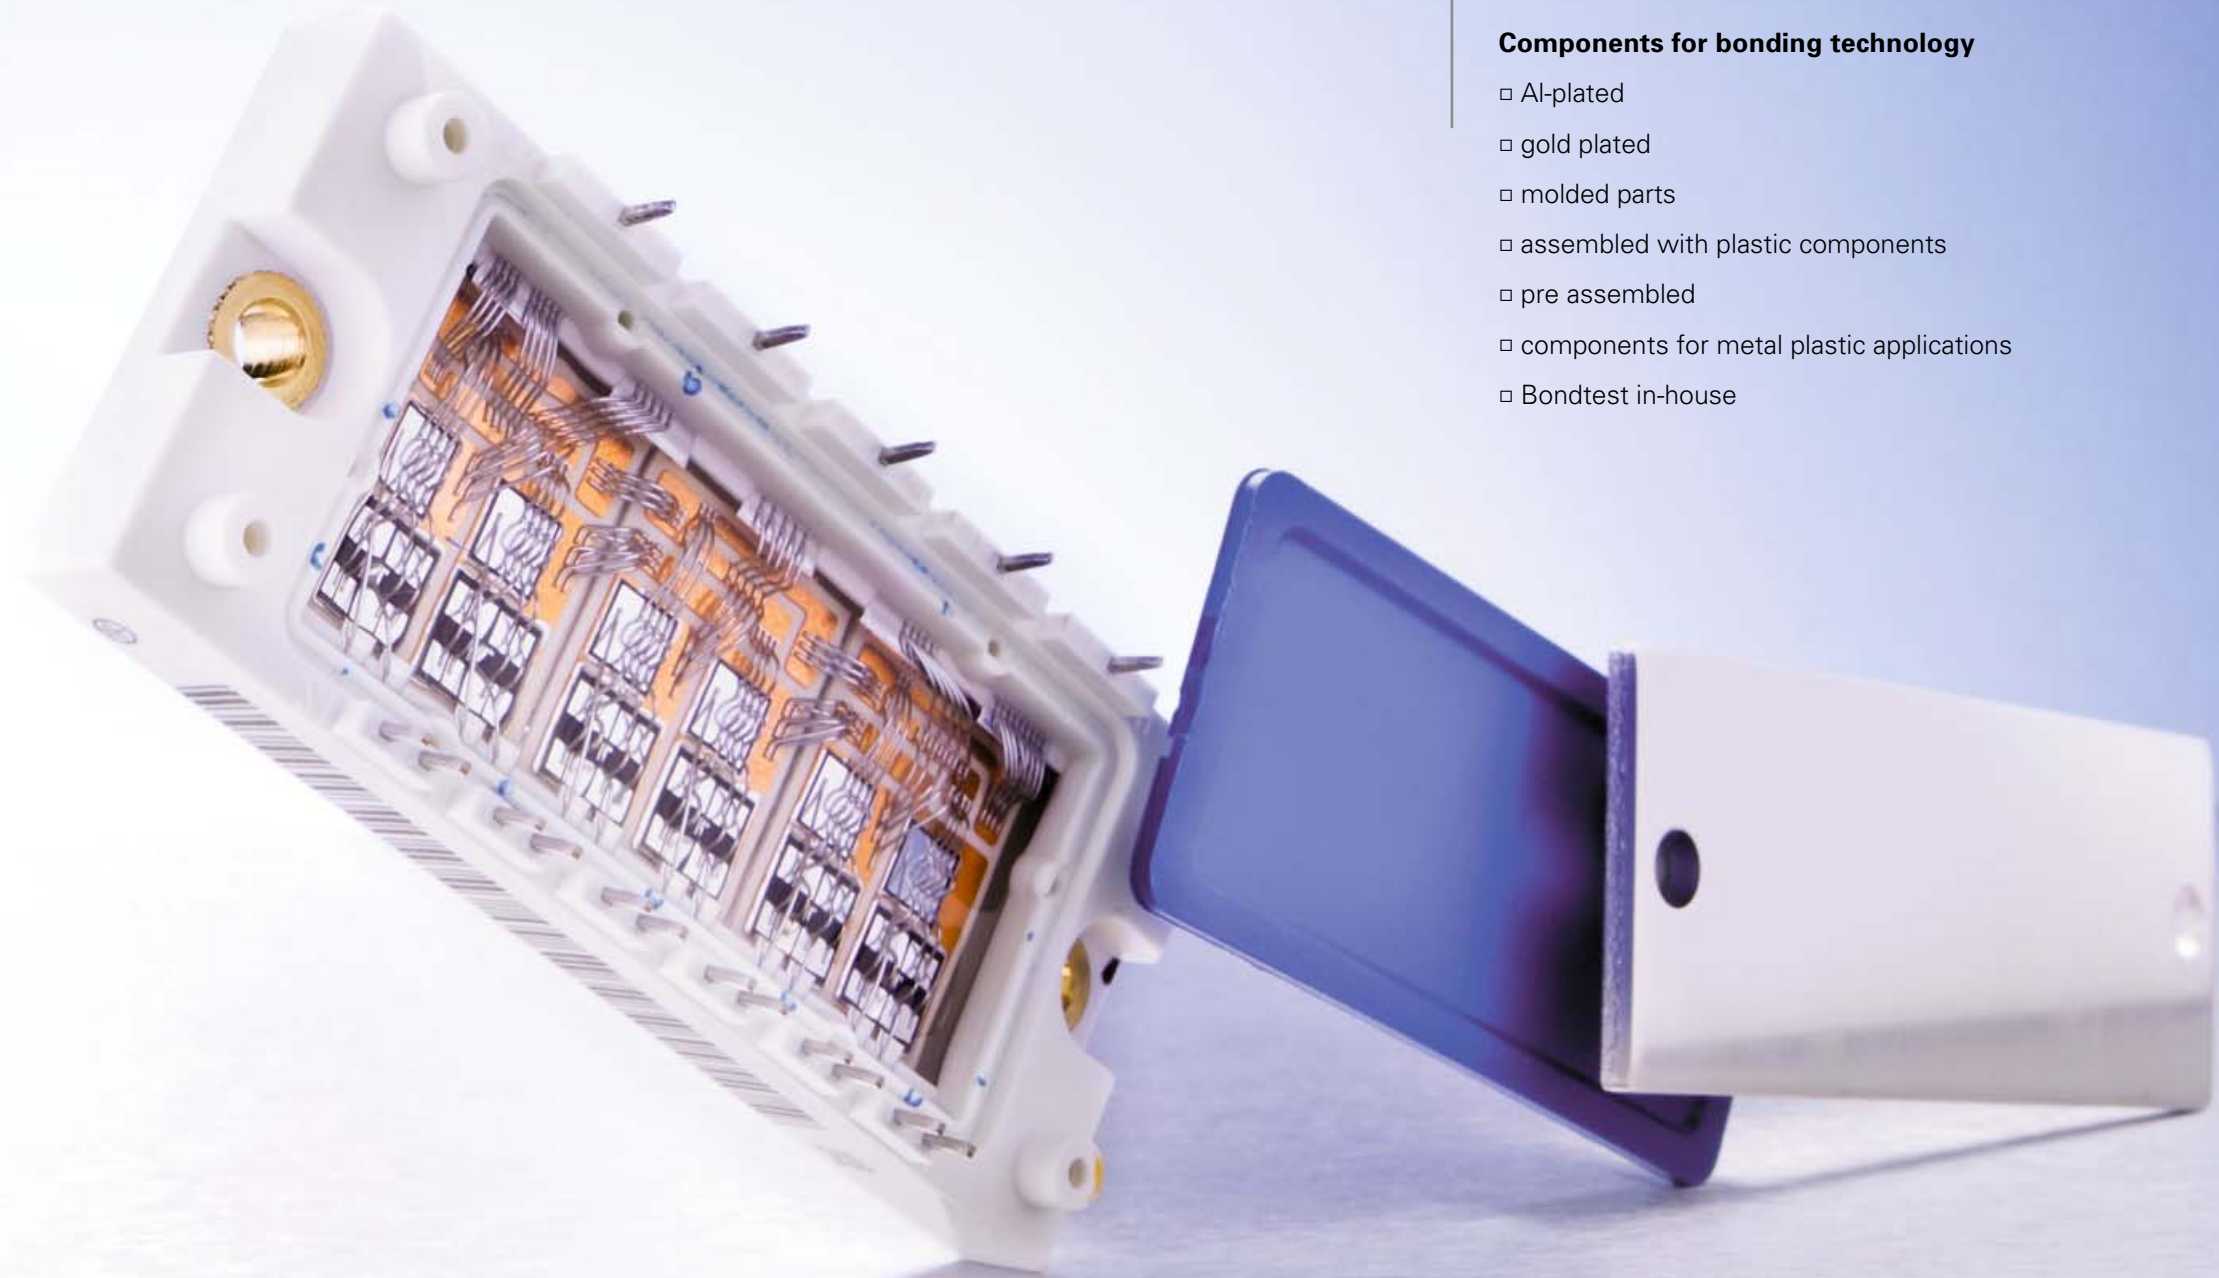

Stamping strips

- with plating
- tin
- spot gold
- partial gold plating
- assembled with plastic parts
- contact rivets
- on coil
- other special packaging

BONDING TECHNOLOGY COMPONENTS

Components for bonding technology

- Al-plated
- gold plated
- molded parts
- assembled with plastic components
- pre assembled
- components for metal plastic applications
- Bondtest in-house

Stampings

- contact springs
- stamping-bending parts
- assembled stamped parts
- plated stamped parts
- material thicknesses
0,05 – 4 mm

Drawn parts

- diameters 1,5 – 220 mm
- rectangle forms 3 x 3 mm
up to 500 x 60 mm
- used for metal ceramic seals
- used for metal-glass-seals

HIGHLIGHTS

Assembled parts

- contact springs
- with rivets or welded contacts
- assembled units
- switches

Metal plastic parts

- mold technology
- welded metal plastic parts
- riveting of metal plastic parts

Who is Binder-Kontakte?

Since 1959 the Binder-tecsys team has been working successfully for our customers in the following industries:

Electromechanical compounds, power electronics, communication, aero and space industry, medical compounds.

We supply customers...

...in Germany, EU, USA, NAFTA, Far East States, Middle East and Australia, Mexico, Brazil.

Realisation and projects from the prototypes to the series production cleaning process

(for the soldering process), packaging for the robot we guarantee a professional carrying out together with an optimizing of cycle time.

Quality management

Since 2004 our quality system is certified according to ISO TS 16949 and guarantees the use of our products according to requirements of our customers – ship to line – ship to stock.

TIME TO MARKET – YOUR LEAD OVER COMPETITORS.
